Summary

Full Stack AI Engineer and SaaS Founder specializing in agentic coding and AI-assisted programming to rapidly architect, scale, and deploy production-grade software. Proven track record of shipping cross-platform applications, high-performance browser extensions, and real-time backend systems. Adept at integrating modern LLMs into development workflows to accelerate full-stack engineering, optimize infrastructure, and dramatically reduce time-to-market.

Skills

Languages: JavaScript (ES6+), TypeScript, SQL, HTML5, CSS3/Tailwind, Python, C

Frameworks: Next.js 14, React Native (Expo), React 18, Node.js, Express, Puppeteer

Tools & Infrastructure: Agentic AI Workflows, Docker, Firebase, PostgreSQL, Prisma, GitHub Actions, Vercel, Render

Experience

Founder & Full Stack AI Engineer

Jan 2024 – Present

Salty Pumpkin Pie LLC

US-Based Entity

- **SaaS & Tool Development:** Founded and incorporated entity to architect and commercialize productivity SaaS tools, utilizing Node.js and AI-assisted programming to achieve a 40% reduction in time-to-market.
- **Infrastructure Management:** Managed robust production environments across GitHub, Vercel, Render, and Cloudflare, ensuring 99.9% uptime for client-facing applications and domain routing.
- **Payment Integration:** Integrated secure payment gateways and managed financial onboarding (including Gharana integration) to process MRR and one-time software purchases.

Projects

ArcaneRP (Cross-Platform Mobile & Web) | *React Native, Firebase, Google Cloud Vision, RevenueCat*

- **High-Growth Launch:** Engineered a social platform using agentic AI workflows, achieving 1,000+ downloads in week one on the Google Play Store with a dual-currency digital economy and VIP subscription system.
- **Real-Time Scalability:** Architected a Firebase backend scaling to 800+ concurrent users, deploying multi-layered moderation pipelines via Google Cloud Vision API for automated AI image scanning.

AutoCod (Chrome Extension) | *Manifest V3, MediaRecorder API, AI Workflows*

- **Enterprise Adoption:** Developed a high-performance screen recording tool currently utilized by enterprise clients including **Wix.com, Yahoo Finance, and 125+ top global agencies.**
- **Advanced Rendering:** Leveraged AI-assisted coding to build a custom Canvas 2D stitching algorithm with sticky-header compensation, ensuring 60 FPS, 8 Mbps video capture and 100% page coverage.

ChaiLink (SaaS Platform) | *Next.js, PostgreSQL, Prisma ORM, Clerk*

- **FinTech Platform:** Architected a monetization platform using AI coding agents to rapidly integrate local payment gateways, featuring a cross-platform Expo Router web-view shell and automated CI/CD pipelines.

Head Tail (Multiplayer Game) | *Node.js, Socket.IO, Firebase*

- **Real-Time Engine:** Built server-side game logic and matchmaking systems for concurrent real-time gameplay, utilizing AI code generation to automate backend build runs and state synchronization.

Grabs AI (B2B SaaS Platform) | *Node.js, Puppeteer, Next.js 14, Stripe*

- **AI Automation:** Deployed a credit-gated lead generation SaaS, optimizing a 6,000+ line Node.js/Puppeteer backend for 50+ concurrent instances through advanced agentic coding workflows.

Education

Virtual University of Pakistan

July 2025

Bachelor of Science in Computer Science (BS-CS)

Superior College

2022 – 2024

Faculty in Science (FSc), Pre-Engineering
